

Vegetation Management Quarterly Update: Q3

Quarterly Update Summary

In Q3, the Vegetation Management program has been working in the area north of the Stanfield Cutoff moving towards Fawnskin. (See Grids G-8, 9, 10, 11 and H-8, 9). Along with the routine trimming, a crew has been designated to handling the data from the LiDAR survey. Over half of the LiDAR infractions have already been mitigated.

The trend of trees dying is continuing and has taken a large amount of crew resources. We have removed well over 100 trees through just the first three quarters.
